Review Of 3665 Cases Of Single Port Laparoscopic Cholecystectomy Performed In 7 Years In Single Community Hospital By Single Surgeon

ChungYun KIM

TNTN Hospital, The Korean Laparoscopic Surgeons' Association Of Community Hospitals, REPUBLIC OF KOREA

Lecture : Recent years cholecystectomy has been widely performed not only in tertiary hospital but at many community hospitals. We would like to present how community hospitals have been actively performing cholecystectomy with safety by reviewing 3665 cases of single port laparoscopic cholecystectomy performed in 7 years in single community hospital by single surgeon.
